### **Read DA\_PAM\_738\_751.pdf**

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

### **Life - Wikipedia**

Design and planning resource for classroom teachers, instructional designers, and professors of education. The glossary lists, describes, and provides links for over 800 educational strategies, theories, and activities.
