Life expectancy is a statistical measure of the average time an organism is expected to live, based on the year of its birth, its current age and other demographic factors including gender. The most commonly used measure of life expectancy is at birth (LEB), which can be defined in two ways. Cohort LEB is the mean length of life of an actual birth cohort (all individuals born a given year) and ...

Aging may be regulated by a discrete set of intracellular proteins including the mechanistic target of rapamycin (mTOR) kinase. mTOR functions within two multiprotein complexes called TORC1 and TORC2. Inhibition of TORC1 has extended life span in every species studied to date and ameliorated multiple aging-related pathologies including declining immune function.

TORC1 inhibition enhances immune function and reduces

Laughter is an especially powerful tool for managing conflict and reducing tension when emotions are running high. Whether with romantic partners, friends and family, or co-workers, you can learn to use humor to smooth over disagreements, lower everyone's stress level, and communicate in a way that builds up your relationships rather than breaking them down.
