The Geometer's Sketchpad® is the world's leading software for teaching mathematics. Sketchpad® gives students at all levels—from third grade through college—a tangible, visual way to learn mathematics that increases their engagement, understanding, and achievement. Make math more meaningful and memorable using Sketchpad. Elementary students can manipulate dynamic models of fractions ...

A constant may be used to define a constant function that ignores its arguments and always gives the same value. A constant function of a single variable, such as  $f(x) = 5$ , has a graph that is a horizontal straight line, parallel to the x-axis. Such a function always takes the same value (in this case, 5) because its argument does not appear in the expression defining the function.

In elementary mathematics, a variable is a symbol, commonly an alphabetic character, that represents a number, called the value of the variable, which is either arbitrary, not fully specified, or unknown. Making algebraic computations with variables as if they were explicit numbers allows one to solve a range of problems in a single computation. A typical example is the quadratic formula ...

Points of Reference for the Conduct of 21st Century Deterrence and Assurance Research. Deterrence and Assurance are abstract political-military concepts. They are also conditions attained in the minds of deterrees and assurees, achieved only at their respective discretion, and only in nuanced context of their unique decision spaces. Activities undertaken to achieve deterrence and assurance ...

The Actual Sequence is the sequence of events in the past that lead up to the current moment of deliberation and decision. The term is used in Direct Arguments, such as Peter van Inwagen's Consequence Argument, Frankfurt-style cases and John Fischer's Semicompatibilism. It is contrasted with the Alternative Sequences that result from Alternative Possibilities.
