Computer science is the theory, experimentation, and engineering that form the basis for the design and use of computers. It involves the study of algorithms that process, store, and communicate digital information. A computer scientist specializes in the theory of computation and the design of computational systems.. Its fields can be divided into a variety of theoretical and practical disciplines.

This is a very similar breakdown to what I teach my students, but I think youâ€™ve missed an important principle: iteration. An analysis never flows smoothly from collection to conclusions â€“ you will often repeat many parts, discovering problems with your data when you model it, thinking of better models after youâ€™ve looked at residuals, â€
