Reflective surfaces can deliver high solar reflectance (the ability to reflect the visible, infrared and ultraviolet wavelengths of the sun, reducing heat transfer to the surface) and high thermal emittance (the ability to radiate absorbed, or non-reflected, solar energy). Reflective surfaces are a form of geoengineering.. The most well-known type of reflective surface is the "cool roof".

Department Overview. Founded in 1994, Kathmandu University, Dhulikhel, has rapidly achieved a status of one of the top institutions in the nation for higher education and scientific research. With the need to develop and deploy the digital concepts that are changing the world rapidly with astonishing inventions and innovation, Kathmandu University launched Computer Science and Engineering program.

Metallurgy is a domain of materials science and engineering that studies the physical and chemical behavior of metallic elements, their inter-metallic compounds, and their mixtures, which are called alloys. Metallurgy is used to separate metals from their ore. Metallurgy is also the technology of metals: the way in which science is applied to the production of metals, and the engineering of ...
