**STANDARD PSYCHIATRIC HISTORY AND PHYSICAL** What follows are the essential elements of the initial psychiatric work-up. Although very similar to the evaluations performed by other fields of medicine, the history and physical (H&P) described below is modified and expanded in certain areas to meet the specific needs of psychiatry.

Thought disorder (TD) or formal thought disorder (FTD) refers to disorganized thinking as evidenced by disorganized speech. Specific thought disorders include derailment, poverty of speech, tangentiality, illogicality, perseveration, and thought blocking.. Psychiatrists consider formal thought disorder as being one of two types of disordered thinking, with the other type being delusions.

Schizophrenia is a mental disorder characterized by abnormal behavior, strange speech, and a decreased ability to understand reality. Other symptoms include false beliefs, unclear or confused thinking, hearing voices that others do not, reduced social engagement and emotional expression, and lack of motivation. People with schizophrenia often have additional mental health problems such as ...

Political abuse of psychiatry is the misuse of psychiatric diagnosis, detention and treatment for the purposes of obstructing the fundamental human rights of certain groups and individuals in a society. It entails the exculpation and committal of citizens to psychiatric facilities based upon political rather than mental health-based criteria. Many authors, including psychiatrists, also use the ...

Recent advances in neuroscience have suggested that exercise-based behavioral treatments may improve function and possibly slow progression of motor symptoms in individuals with Parkinson disease (PD). The LSVT (Lee Silverman Voice Treatment) Programs for individuals with PD have been developed and researched over the past 20 years beginning with a focus on the speech motor system (LSVT LOUD ...
