

### **template matching techniques in pdf**

Template matching is the generic name for a set of techniques that quantify the similarity of two digital images, or portion thereof, in order to establish whether they are the same or not. Digital images are commonly represented with numerical arrays: monochrome images require

Template Matching techniques compare portions of images against one another. Sample image may be used to recognize similar objects in source image.

### **Template Matching - u-szeged.hu**

Template matching provides a new dimension into the image- ... intensity values of both image and template. Following are the techniques under this category: squared differences in fixed intensities, correction-based methods, optimization methods and mutual information.

Applying Parallel Design Techniques to Template Matching with GPUs Robert Finis Anderson, J. Steven Kirtzic?, and Ovidiu Daescu?? University of Texas at Dallas Richardson, TX, USA frfa061000, jsk061000, daescug@utdallas.edu Abstract. Designing algorithms for data parallelism can create significant gains in performance on SIMD architectures.

template matching techniques described by Le et al [2]. This is our method of matching a 3D model to a target image I: 1. Using the 3D model, generate a 2D projection at some pose ( $\theta$ ,  $\phi$ ) and scale (z). This will

be the template image,  $T$ . 2. Convert  $T$  and  $I$  to grayscale, if necessary. 3. Apply a Gaussian blurring filter to  $T$  and  $I$ .
