A trommel screen, also known as a rotary screen, is a mechanical screening machine used to separate materials, mainly in the mineral and solid-waste processing industries. It consists of a perforated cylindrical drum that is normally elevated at an angle at the feed end. Physical size separation is achieved as the feed material spirals down the rotating drum, where the undersized material ...

A: You could find out who currently owns the mineral rights under the property by searching the land records at the county clerk's office, or online. In lieu of that you could contact a local abstract office and have them do the search for you. The county clerk's records can be searched for free however so I'd try that first.
